

## TikZ Styles

The following shows the different line widths you can use when drawing in TikZ. This should be an optional argument to the draw command.

```
figure[H] tikzpicture[yscale=0.5] [very thin] (0,0) -- (3,0) node[right] Very thin; [thin] (0,-1) -- (3,-1)
node[right] Thin; [thick] (0,-2) -- (3,-2) node[right] Thick; [very thick] (0,-3) -- (3,-3) node[right] Very thick;
[ultra thick] (0,-4) -- (3,-4) node[right] Ultra Thick;
[ultra thick] (current bounding box.north east) rectangle (current bounding box.south west);
```
